CLIENT NEEDS / WANTS

- Furniture Piece
- Elements that promote daily exercises
- Peg board wall in arena
- Activities for fine motor skills
- Safety considerations

FURNITURE IDEA

Combine the designs of a play stair set, with the option of storage, as well as an interactive wall/side.

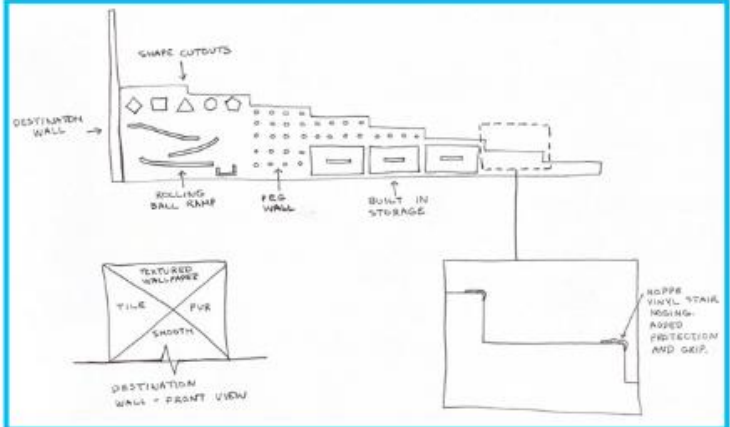

The stairs would provide a physical obstacle for kids to practice muscle control on. The option of have storage offers organization and cleanliness to the space without taking up other purposeful space in the room. An interactive side/wall would allow the stairs to have functions for physical and mental/ cognitive practices. Shapes, pegs, and lights of different kinds could be combined into the element for an interactive station.

The addition of adding elements of different materials; fur, feathers, leather, wood; will help with feeling and touch as well.

The piece itself is focused on physical therapy by having children walk up steps using their muscles to balance and step up. Walking up and down stairs is a life-skill, something that TherAplay wants to focus on strengthening in each child!

PRELIMINARY SKETCHES

The steps have been shortened to be less height per step. This is to help the kids really be able to do the stairs on their own without much need of assistance. This is good practice for their mobility on steps and balancing as they move upwards.

Ropper Vinyl Stair nosing would add protection to the stair corners, making them less dangerous as children travel up the

These photos demonstrate interactive items that would work on fine motor skills and cognitive practices. Incorporating elements of color and shape will promote visual learning while the movement of pieces throughout the interactive wall will
