Call for Papers

We are always soliciting contributions for future issues of this journal. Contributions are accepted from all undergraduate students who have worked on a project beyond the classroom in any mathematical area (e.g., pure, applied, actuarial, and education). Appropriate papers from other departments and other institutions are also welcome. Often the articles are written by undergraduates individually, working in teams, or working with faculty. On occasion we also include articles written solely by faculty or graduate students as long as they are accessible to undergraduates.

To submit an article, please select ONE member from the editorial board, and forward your material (including your advisor's name and contact information) in PDF form, usually prepared by LaTeX (preferred) or Microsoft Word, to the editor you selected. Review and selection of articles is handled by the editorial committee. Editorial changes of accepted articles are communicated through students' advisors, when appropriate.

More information, including links to all previous issues, are available online at <https://digitalresearch.bsu.edu/mathexchange>.
