Christian M. Morgan - Ball State University

Call for Papers

We are always soliciting contributions for future issues of this journal. Contributions are accepted from all undergraduate students who have worked on a project beyond the classroom in any mathematical area (e.g., pure, applied, actuarial, and education). Appropriate papers from other departments and other institutions are also welcome. Often the articles are written by undergraduates individually, working in teams, or working with faculty. On occasion we also include articles written solely by faculty or graduate students as long as they are accessible to undergraduates.

To submit an article, please select ONE member from the editorial board, and forward your material in PDF form, usually prepared by LaTeX (preferred) or Microsoft Word, to the editor you selected. We use double anonymized peer review, the identities of both reviewers and authors are concealed from each other throughout the review. To facilitate this, please remove any identifying information, such as authors' names or affiliations, from your manuscript before submission. Please ensure that the title page (that include all authors' names and affiliations, a complete address of the corresponding author including an email address, acknowledgements, and conflict of interest statement) is present in your submission as a separate file. If authors are undergraduate students, please include your advisor's name and contact information in the title page. Review and selection of articles is handled by the editorial committee. Editorial changes of accepted articles are communicated through students' advisors, when appropriate.

More information, including links to all previous issues, are available online at <https://digitalresearch.bsu.edu/mathexchange>.
